

**SECTION 1 - PRODUCT AND COMPANY IDENTIFICATION**

Product identifier/Trade name: SAFEBLEND BATHROOM CLEANER, TILE, TUB & BOWL
Product code/Internal Identification: CCS BTFR
Product use/Description: Ready to use bathroom cleaner for tiles, tub & bowl, with fresh fragrance
Supplier identifier: Chemotec (PM) Inc.
8820 Place Ray Lawson
Anjou, Québec, Canada H1J 1Z2
Phone: (514) 729-6321; 1-800-729-6321

Manufacturer identifier: Chemotec (PM) Inc.
8820 Place Ray Lawson
Anjou, Québec, Canada H1J 1Z2
Phone: (514) 729-6321; 1-800-729-6321

Emergency phone number: (613) 996-6666 (CANUTEC)

SECTION 2 - COMPOSITION / INFORMATION ON INGREDIENTS

Ingredients	CAS #	% (weight)	ACGIH TLV	OSHA PEL
Alcohol ethoxylate	68991-48-0	1-5	None established	None established
Organic acid salt	207308-34-7	5-10	None established	None established

SECTION 3 - HAZARDS IDENTIFICATION**Emergency Overview**

Clear colorless liquid with a fresh fragrance. CAUTION. Will cause severe eye irritation. May also cause skin irritation.

POTENTIAL HEALTH EFFECTS (for more details, refer to Section 11)

Primary entry route(s): Eye, skin and ingestion.

Eye: Severe eye irritation.

Skin: Irritation

Inhalation: No effect expected.

Ingestion: Harmful if ingested.

Long-term (chronic) exposure: Prolonged contact with the product will cause irritation, drying, defatting and dermatitis.

Conditions aggravated by exposure: None expected.

Carcinogenic status: See TOXICOLOGICAL INFORMATION, Section 11.

Additional health hazards: For further information, see TOXICOLOGICAL INFORMATION, Section 11.

Potential environmental effects: See ECOLOGICAL INFORMATION, Section 12.

SECTION 4 - FIRST AID MEASURES

Eye contact:

Immediately rinse with plenty of water for 15 minutes, keeping eyelids open. Seek medical attention.

Skin contact:

Rinse immediately with water and mild soap for 15 minutes. Remove soiled clothes and wash before wearing. Seek medical attention should an irritation develop.

Inhalation:

Bring the person to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen and seek medical attention if discomfort persists.

Ingestion:

If conscious, give plenty of water. Never give anything by mouth if the person is unconscious. Do not induce vomiting. Seek immediate medical attention.

SECTION 5 - FIRE FIGHTING MEASURES

Fire hazards/conditions of flammability:

Not flammable under normal handling conditions. Closed containers may rupture if exposed to excess heat or flame due to a build-up of internal pressure.

Flash point (Method): Does not ignite

Lower flammable limit (% by volume): N/Av

Upper flammable limit (% by volume): N/Av.

Explosion data - Sensitivity to mechanical impact: Not applicable

Explosion data - Sensitivity to static discharge: Not applicable

Auto-ignition temperature: N/Av

Suitable extinguishing media:

Water spray, dry chemicals, carbon dioxide.

Special fire-fighting procedures/equipment:

Evacuate personnel to a safe area. During a fire, irritating smoke and fumes may be generated. A self-contained breathing apparatus and full body protection is required for fire-fighting personnel to protect themselves from irritating products produced during the combustion. Move containers from fire area if it can be done without risk. Keep containers cool with water spray. A stream of water directed into the product generates a lot of foam.

Hazardous combustion products:

Oxides of carbon and nitrogen and other irritating gases. Hydrogen gas may be produced upon contact with metals.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions:

Wear adequate personal protective equipment (See Section 8).

Spill response/Cleanup:

Wear personal protective equipment. Stop the leak if you can do so without risk. Pump the product into drums for disposal; or clean up spills using absorbent material and place in waste container for destruction. Resume cleaning by rinsing with water. Prevent large spills from entering sewers or waterways.

Environmental precautions:

Biodegradable.

Prohibited materials: N/Av

Special spill response procedures: N/Av

SECTION 7 - HANDLING AND STORAGE

Safe handling procedures:

Keep out of reach of children. Wear protective equipment and follow good personal hygiene practices. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Avoid contact with skin, eyes and clothing. Keep away from heat and flame; do not store at temperatures above 48°C (120°F). Keep containers closed when not in use. Do not use with incompatible materials such as strong oxidizing agents or alkaline materials (see section 10).

Storage requirements:

Store in a tightly sealed container, in a well ventilated room. Do not store in metal containers as hydrogen gas could be produced. Do not store with food products. Keep from freezing.

Special packaging materials: N/Ap

SECTION 8 - EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering controls:

A mechanical ventilation system is recommended.

Respiratory Protection:

Not required under normal applications. In case of prolonged contact, or if engineering controls and work practices are not effective in controlling exposure to this material, then wear suitable approved respiratory protection. Have appropriate equipment available for use in emergencies such as spills or fire.

Skin protection and other protective equipment:

Use impervious (rubber or nitrile) gloves. Wear waterproof boots for prolonged contact with spills.

Eye / face protection:

Wear protective chemical safety goggles to manipulate large quantities.

General hygiene considerations:

KEEP OUT OF REACH OF CHILDREN. Avoid contact with eyes. Never eat, drink, or smoke in work areas. Practice good personal hygiene after using this material.

Permissible exposure levels: For individual ingredient exposure levels, see Section 2.

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Physical state, colour and odour: Clear colourless liquid with a fresh fragrance.

Odour threshold: N/Av

pH: 1.05

Boiling point: Approximately 100 °C (212 °F)

Melting/freezing point: Approximately 0 °C (32 °F)

Vapour pressure: Approximately 20 mm Hg (water)

Solubility in water: Complete.

Coefficient of oil/water distribution: N/Av

Specific gravity or density (water = 1, at 4 °C): 1.03 g/cm³@ 20 °C (68 °F)

Vapour density: Approximately 0.6 (water)

Evaporation rate: Approximately 0.4 (water)

% volatile by volume: Not available

Viscosity: < 1000 cps @ 25 °C (77 °F)

**SECTION 10 - REACTIVITY AND STABILITY DATA****Stability and reactivity:**

Stable at room temperature, in normal handling and storage conditions. Temperature must not exceed 48°C (120°F).

Polymerisation: Hazardous polymerization will not occur.

Conditions to avoid:

Heating above 110°C will result in an exothermic decomposition with release of CO₂.

Materials to avoid:

Avoid oxidizers. Contact with hypochlorites (e.g. chlorine bleach, etc) will liberate toxic gases. Contact with alkaline materials (e.g. aqua ammonia) will generate heat. This material may be extremely hazardous in contact with some industrial chemicals like nitrates (e.g. fertilizers), chlorates, cyanides or sulfides.

Hazardous decomposition products:

See under Materials to avoid.

SECTION 11 - TOXICOLOGICAL INFORMATION

Toxicological data: The calculated LD₅₀ for this product is greater than 7,000 mg/Kg, oral, rat; SAFE BLEND products are not tested on animals.

Ingredient	LD ₅₀ (route, species)	LC ₅₀ # hours (species)
Alcohols ethoxylates	>2000 mg/kg (oral, rat)	N/Av
Organic acid salt	1,400 mg/kg (oral, rat)	N/Av

For more details, refer to Section 3.

Carcinogenicity: No ingredient listed by IARC, ACGIH, NTP and OSHA as a possible carcinogen.

Teratogenicity, mutagenicity, other reproductive effects: N/Av

Skin sensitization: N/Av

Respiratory tract sensitization: N/Av

Synergistic materials: N/Av

Other important hazards: N/Av

SECTION 12 - ECOLOGICAL INFORMATION

Environmental effects: Product is expected to be readily biodegradable as per OECD 301.

Important environmental characteristics: Product is expected to be readily biodegradable as per OECD 301.

Aquatic toxicity: There is no test data on this product.

SECTION 13 - WASTE DISPOSAL**Handling and storage conditions for disposal:**

Store material for disposal as indicated in Handling and Storage (Section 7).

Methods of disposal:

Dispose according to existing federal, provincial and municipal regulations.

SECTION 14 - TRANSPORTATION INFORMATION

Transportation of Dangerous Goods (TDG) in Canada :

Proper shipping name: Not Regulated
Class: N/Ap
Identification number: N/Ap
Packing group: N/Ap
Special case: N/Ap

SECTION 15 - REGULATORY INFORMATION

In Canada

WHMIS information:

Product is regulated according to the Controlled Product Regulation (CPR) in Canada. This product has been classified in accordance with the hazard criteria of the Controlled Products Regulations (CPR) and this MSDS contains all the information required by the CPR.

WHMIS Classification: D2B – Toxic Materials with other effects

CEPA information: Ingredients are listed on the DSL inventory.

Other information:

HMIS: 0 Minimal 1 Slight 2 Moderate 3 Serious 4 Severe
Health Hazard: 2
Fire Hazard: 0
Reactivity: 0
Personal Protection: (See section 8.)
NFPA: 0 Minimal 1 Slight 2 Moderate 3 Serious 4 Severe
Health: 2
Fire Hazard: 0
Reactivity: 1
